

Andersen Winches

The World's Best in Stainless Steel

Design with a Vision

ANDERSEN Winches® are all about Design and Engineering. We believe in setting standards, as this is the only way we can ensure a lifetime of safe sailing for our customers and a future at sea for our products. To achieve this, we employ state-of-the-art manufacturing technology, and our staff is dedicated to continuous development. We remain at the cutting edge of development by working closely with yachtsmen and sailing professionals.

After half a century of designing and manufacturing ANDERSEN Winches® — and with most of these still on the job — we feel we've earned the right to be proud. Our success also encourages us to continue developing standard setting equipment.
