

Firm Grip, Precise Control

Ronstan Battlestick™ tiller extensions provide the highest level of control, for quick, decisive helm response in every situation.

Evalon® Grip

This firm non-slip grip material does not absorb water. End knob for safety and positive hand positioning. Large grip diameter contrasts ergonomically with mainsheet diameter to relieve fatigue.

Fluted Alloy Tube

Ronstan's unique fluted profile adds extra rigidity to the lightweight alloy section. Tubes have a black anodised finish for corrosion protection.

The Right Length

Fixed length extensions are available in six standard lengths. Telescopic version are available in four configurations, up to the maximum of 2490mm (98") long with 960mm (38") of adjustment.

Comfort

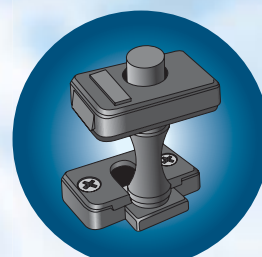

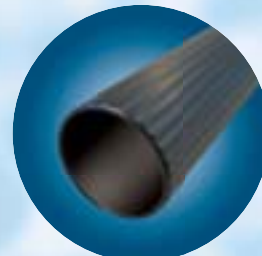

Ladder style tiller extensions handle the higher helm loads of small keelboats, with three grip positions for maximum comfort, minimum fatigue. The handle rotates allowing a secure grip to be maintained through a tack, gybe or change of helm position.

Urethane Universal Joint

Smooth, uniform rotation in all directions and a quick, firm response to steering movements.

Simplicity

The standard RF3133 universal joint with snap-on cover is designed to allow quick fitting and removal of the tiller extension from the fixed base. A curved surface adapter is available for mounting on round tiller sections.
